

Import Kit

- 1 Place the downloaded drum kit file (xxxx.xd3kit) in the Import folder of the SD card.

* If there is no "Import" folder, it will be created once the SD card is inserted into the xD3 drum module.

- 2 Insert the SD card in to the xD3 drum module.
- 3 Press the [ENTER/MENU] button from the Home Screen.

- 4 Turn the value knob to select the SETUP and confirm with the [ENTER] button.
- 5 Press the [4] (UTILITY) button and select the Utility tab.

- 6 Select the Import Kit with the value knob and press the [ENTER] button.

- 7 Select the drum kit file to import with the value knob.

- 8 Press the [5] (IMPORT) button to import.

When the import is completed, the screen indicates "Completed."

* It takes about 5 minutes to import.

* The downloaded drum kit file can only be imported in to the xD3 drum module when the product IDs matched. If the products IDs do not match, the following message is displayed.

"This xD3 doesn't have a permission to import "xxxx"."
